### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Keith M. Baxter (Reg. No. 31,233) on September 17, 2007.

3. The application has been amended as follows:

Claims 21-22 (Currently Canceled).

4. The following is an examiner's statement of reasons for allowance:

With respect to the Remarks filed on September 5, 2007, the Applicant's argument was persuasive.

On page 8 of the Remarks, Applicant indicates that Examiner incorrectly cited the Applicant Admitted Prior Art with respect to the "speculative execution" in the claim 1 of current invention. It was incorrectly cited because the AAPA is referring to US Patent 7,120,762, which is inventor's own work and was published in April 24, 2003. Examiner agreed and persuaded with Applicant's argument.

As for the limitation cited from the AAPA, Chaudhry et al., however, discloses a method of "speculative execution", wherein the speculative thread performs join operation with the head thread when the speculative thread is holding no locks.

Assuming Srinivas et al. discloses all other limitations of claim 1, there is no motivation to combine Chaudhry et al. invention with Srinivas et al. invention because there is no contention to set a priority between the head thread and the speculative thread since they rather are joint operation.

Examiner further agrees and persuades with the Applicant's argument presents on pages 9-10 of the Remarks.

Claim 1 of the current invention includes "a conflict resolution circuit executing hardware program" to perform the method of detecting critical section, wherein the "critical section" is defined in the specification as "portions of a thread". Srinivas et al. does not particularly disclose a hardware resolution circuit but rather a software process that help to resolve the contention between operation processes. In addition, the shared data (link lists) as being used by different processes in Srinivas is not equivalent to a critical section as currently recited.

For the same reason in claim 1, claim 23 is also allowable.

All claims that are directly or indirectly depending to claims 1 are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
